

Scripting

[English](#) • [Deutsch](#) • [Español](#) • [Français](#) • [Italiano](#) • [???](#) • [Polski](#) • [Português](#) • [??????](#) • [Svenska](#) • [???\(????\)?](#) • [???\(??\)?](#) •

You are here: [DD-WRT wiki mainpage](#) / Scripting

- [Telnet/SSH and the Command Line](#) - A general introduction to many
 - ◆ [Basic Linux commands](#) and
 - ◆ some DD-WT [key commands](#) in particular
- [LED Scripts](#) - scripts that control the router lights
- [Linux Inside](#)
- [MyPage](#) - rely heavily on the javascript dd-wrt libraries, nvram program and on generic linux commands. Every router that is supported by dd-wrt can use Mypage without having problems .
- [Script Examples](#)
- [Useful Scripts](#) - miscellaneous scripts that are useful
- [Remote Scripts](#) - scripts that interact with a dd-wrt router remotely
- [Startup Scripts](#) - web-GUI method, NVRAM method, and more
- [Script Execution](#) - place scripts in config folders to have them run automatically
